Non-Verbal – Shapes

Which one is the odd one out and why?

When you are looking at a set of pictures, you may therefore need to count the number of sides of each shape in order to see if there is a link between any of the pictures.

A   B   C   D   E

The others all had 5 sides

Sometimes, each picture will contain several shapes, but only one of the shapes will be important to the question.

A   B   C   (D)   E

The others have a triangle.
